Investment Horizon

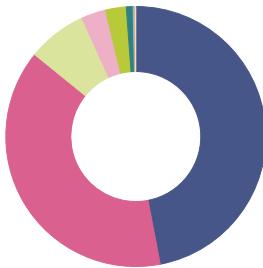

Investment Objective

This suits investors with a minimum three-year timeframe or those that seek a portfolio invested predominantly in interest bearing assets, with a small proportion of growth assets. This portfolio also suits investors who give a high priority to the preservation of capital (while understanding loss is still possible) and are therefore willing to accept lower potential investment performance, hence the 85 percent exposure to defensive assets (cash and fixed interest).

Investment Strategy

A low cost diversified portfolio of securities with an average exposure of 15% to growth assets and around 85% to defensive assets. The portfolio is designed for investors seeking relatively stable returns with low potential for capital loss.
